

Ram-Pack Baler 400

The Mardon Ram-Pack range of baling presses have been designed especially for shops and warehouses. Manufactured in Ireland by a company with 25 years experience in heavy engineering, these are machines built to last! All Ram-Pack balers have a full hydraulic system and are extremely quiet in operation – a real advantage if the baler has to stand outside. Every machine comes with a 12-month parts and labour warranty.

The Ram-Pack 400 has a bale weight output up to 450 kg – a mill-size bale. The Ram-Pack 400 has a large loading aperture and is ideal for use where there are medium to large volumes of material for baling. It has 4-wire tying for a secure bale, and a fully automated bale ejector makes bale ejection clean and simple

Technical Data

Height:	2.80 m
Width:	1.73 m
Depth:	1.0 m
Weight:	1075 Kgs
Power Supply:	3 Phase 400volt
Pressing Force:	Up to 30 Tonnes
Motor:	11Kw, 32 amp
Noise level:	75 Decibels
Cycle time:	45 Seconds
Transportation height:	2.3 m

Loading Aperture Size

Height:	0.66 m
Width:	1.2 m

Bale size

Height:	1.0 m
Width:	1.2m
Depth:	0.8 m
Bale Weight:	350-400Kgs - depending on type of material used
